

**DATA SHEET FOR  
LUNDS 3" POST CLAMP BRACKET FOR THE DENNARD 2010 CAMERA  
Part No. 231105-310**

**LUNDS 3.5" POST CLAMP BRACKET FOR THE DENNARD 2010 CAMERA  
Part No. 231105-320**

This version of the 3" Post Collar is manufactured entirely from 3mm thick Zintec. We also have an 89 mm (3½") version as standard but other size bores can be manufactured on request.

Zintec is a commercially available mild steel sheet that has a zinc coating to offer good rust proofing properties. The finish will be "Spectrum 4" Powder coating that has "Low Smoke, Zero Halogen" properties as specified by London Underground Ltd. The Standard colours available are either Traffic White RAL9016 or Mid Grey. Other colours can be obtained on request.

The total weight of the bracket assembly is in the region of 1.8 Kg and requires six M6 fixings to clamp the collars to the post (supplied). All fixings will be BZP high tensile steel as standard. The "Collars" have a small amount of welding on each corner to prevent the sheet from spreading when the assembly is clamped under pressure.

The assembly has three M6 bushed fittings on both sides to fit the Dennard 2010 fixing positions.

The bracket, in it's current configuration, is capable of holding two cameras. Please check that the camera fixing positions are the correct pitch for your chosen camera model.
